The Leadership North Fulton (LNF) Program begins in September with a reception followed by the opening retreat and team building/ropes course. There will be a day-long class one day each month from October through April followed in May by an overnight closing retreat and graduation at the Greater North Fulton Chamber of Commerce breakfast. Please refer to the [schedule](#) for exact dates.

As part of the Program's objectives, participants will explore, examine and discuss relevant issues and solutions in the North Fulton area. As a means to this end, participants will visit different facilities related to government, economic development, judicial, social service needs, educational, environmental and health care.

Class members will learn to enhance leadership skills through use of a professional facilitator in the areas of management, diversity and change and conflict mediation. Further, participants will promote interaction through group discussions and activities. Each participant, along with a group of four or five fellow participants, will be assigned to a project team. These teams will conceptualize, create and implement a community-based project. These projects are an exciting and integral part of the class experience.

The leadership curriculum was developed by [Dr. Beverly Y. Langford](#), Chairman of LMA Communication, a corporate communications consulting firm that works with corporations, organizations, and management on issues, such as corporate communication strategies and structures, message development, interpersonal communication, and leadership. Dr. Langford serves as the instructor and facilitator on many of the class days.
